Biswajeet Bishoyi

Civil Engineering Student II Graphic Designer II Coding Enthusiast
Bhubaneswar, Odisha, India

Summary

I like building things that make sense — whether it's a structure, a layout, or a piece of code.

I'm a Civil Engineering student who also works as a freelance graphic designer and coder, blending creativity with logic. From designing brand identities to experimenting with programming in C, Python, Java, JavaScript, and HTML, I've learned that good design and strong engineering share the same goal: clarity and structure.

Right now, I'm diving deeper into structural engineering and exploring how design and computation can reshape the way we visualize and build the world around us.

Experience

American Society of Civil Engineers

S.M.ASCE

February 2025 - Present (1 year 5 months)

India

Active member of the ASCE student chapter, engaging in events, workshops, and discussions that promote innovation and professional growth in civil engineering.

Collaborating with peers and faculty to explore sustainable infrastructure, structural design, and emerging technologies in the field.

The Odisha State Police Housing & Welfare Corporation Ltd.

Student Intern

December 2025 - January 2026 (2 months)

Bhubaneswar, Odisha, India

Highway Delite
